

NIDHIN B

FULL STACK DEVELOPER

6385386029 | nidhinbabu171@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience in designing, developing, and deploying scalable web applications using the MERN Stack and modern JavaScript frameworks. Proficient in React.js, Next.js, Node.js, Express.js, NestJS, MongoDB, TypeScript, Redux, and REST APIs. Experienced in building multi-tenant SaaS platforms, e-commerce systems, and real-time applications with JWT authentication, Socket.IO, WebRTC, Redis caching, and AWS deployment. Strong understanding of system design, software architecture, database design, performance optimization, caching strategies, and responsive UI development. Skilled in applying clean architecture principles, SOLID principles, and industry best practices to deliver secure, scalable, and maintainable solutions. Seeking opportunities to contribute to innovative engineering teams while continuously growing as a software developer.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Python

Frontend Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Material UI, Chakra UI, Redux Toolkit, Zustand, Responsive Web Design

Backend Development: Node.js, Express.js, NestJS, RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC), Socket.IO, WebRTC, Microservices Architecture

Databases & Caching: MongoDB, PostgreSQL, Redis, Database Design, Query Optimization

Cloud, DevOps & Deployment: AWS (EC2), Docker, Kubernetes, Git, GitHub, CI/CD Fundamentals, Linux

Software Architecture & Engineering: System Design, Clean Architecture, SOLID Principles, Design Patterns, Modular Monolithic Architecture, Scalable Application Development, Performance Optimization, Caching Strategies

Real-Time & Communication Technologies: Socket.IO, WebRTC, Real-Time Notifications, Chat Systems, Video Conferencing

Integrations & Payment Systems: Razorpay Payment Gateway, REST API Integration, Third-Party Service Integration

Development Tools: Postman, VS Code, Figma

PROFESSIONAL EXPERIENCE

Full Stack Developer Trainee — Greenmen Consulting Pvt. Ltd.

2024 – 2024

Chennai, Tamil Nadu

- Completed intensive training in Full Stack Development with a focus on the MERN Stack, modern JavaScript frameworks, and scalable web application development.
- Developed and maintained frontend and backend features using React.js, Next.js, Node.js, Express.js, MongoDB, and TypeScript.
- Built and consumed RESTful APIs, implemented database operations, and integrated third-party services into web applications.
- Worked with modern state management solutions, responsive UI development, and component-based architecture to enhance user experience.
- Participated in Agile development processes including sprint planning, code reviews, debugging, and testing.
- Gained hands-on experience with Git, Docker, AWS EC2, PostgreSQL, and Redis for deployment and production workflows.

PROJECTS

Employee Management SaaS Platform | Full-Stack SaaS Application [Live Link](#)

- Architected and developed a multi-tenant SaaS platform for employee, project, and organizational management using Next.js, NestJS, MongoDB, Redis, and Docker.
- Applied Clean Architecture, SOLID principles, and modular monolithic design patterns to create a scalable and maintainable codebase.
- Implemented secure authentication, authorization, onboarding, and subscription management using JWT, OTP verification, RBAC, and invitation-based access control.
- Integrated social authentication with Google and GitHub for streamlined and secure user login.
- Built HRMS modules covering employee management, attendance, leave tracking, department management, policy administration, and approval workflows.
- Developed Jira-style Agile project management features including sprint planning, backlog management, issue tracking, ticketing, and collaboration tools.

- Enabled real-time collaboration through Socket.IO and WebRTC with notifications, chat, discussions, and video conferencing capabilities.
- Improved system performance and user experience using Redis caching, Zustand state management, and Next.js optimization techniques.
- Containerized and deployed services with Docker, ensuring portability, reliability, and streamlined development workflows.
- Configured a custom domain and deployed the application on an AWS EC2 server for production hosting.

Trendrove | Full-Stack E-Commerce Application

- Architected and developed a full-stack e-commerce platform for men's, women's, and unisex fashion products using React, Express.js, MongoDB, Socket.IO, Material UI, Tailwind CSS, and Redux.
- Implemented secure authentication and authorization workflows using JWT, HTTP-only cookies, session management, role-based access control (RBAC), and protected routes.
- Designed and developed advanced product catalog management with support for product variants, color and size options, inventory tracking, category management, dynamic filtering, and search functionality.
- Built a feature-rich shopping experience including persistent shopping cart, wishlist management, product recommendations, sorting, and personalized user interactions.
- Integrated Razorpay Payment Gateway for secure online payments, transaction processing, and seamless checkout experiences.
- Developed comprehensive order management modules supporting order placement, order tracking, cancellation requests, return processing, refund workflows, and order history management.
- Implemented promotional and marketing features including coupon management, discount campaigns, offer management, dynamic pricing strategies, and inventory-based promotions.
- Integrated Map APIs to provide live order tracking, real-time location updates, and automatic address retrieval/geocoding for enhanced delivery management and user experience.
- Enabled real-time customer support and engagement through Socket.IO-powered live chat between customers and administrators, along with instant order status notifications and updates.
- Set up custom domain mapping and deployed the application on an AWS EC2 instance with production-ready hosting configuration.

Real-Time Chat Application | Full-Stack Messaging Platform

- Developed a real-time messaging platform using React, Express.js, MongoDB, Redux, Socket.IO, and Material UI, supporting seamless one-to-one and group communication.
- Implemented secure user authentication and authorization using JWT-based authentication, protected routes, and session management to ensure secure access control.
- Built advanced user discovery and connection features, enabling authenticated users to search for other registered users and initiate private conversations instantly.
- Developed rich messaging capabilities including real-time text messaging, emoji support, image and video sharing, message delivery updates, and persistent chat history.
- Designed and implemented comprehensive group management functionality with group creation, participant management, admin controls, role management, and group messaging features.
- Created user and group profile management modules with responsive, modern interfaces using Material UI, while leveraging Redux for scalable state management and optimized user experience.
- Configured custom domain routing and deployed the application on AWS EC2, implementing production-grade server configuration, environment management, and scalable hosting infrastructure.

EDUCATION

MERN Stack Development Bootcamp — Brototype

2024 – 2026

Trivandrum, Kerala

Higher Secondary Certificate (Science)

2022

Gudalur, Tamil Nadu

LANGUAGES

- English (Professional Working Proficiency)
- Tamil (Native/Fluent)
- Malayalam (Native/Fluent)
